

“Voluntary Product Accessibility Template” and “VPAT” are registered service marks of the Information Technology Industry Council (ITI)

Liaison International Accessibility Conformance Report

Revised Section 508 Edition
(Based on VPAT® Version 2.5)

Name of Product/Version:	Liaison International – CAS 3+	
Report Date:	October 5, 2026	
Product Description:	CAS 3+ is Liaison International’s Centralized Application Service platform, which enables applicants to create an account, build their academic and experience history, and submit applications to participating programs on desktop and mobile devices.	
Contact Information:	Michael Margitich, VP CAS Products (mmargitich@liaisonedu.com)	
Notes:	This report reflects the accessibility status of CAS 3+ based on open accessibility defects identified through automated testing and manual assessment. Conformance is mapped to WCAG 2.2 Level A and Level AA success criteria. As a multitenant configurable product, each program may configure its own forms, questions, and content, which may affect conformance.	
Scope:	The pages in the following table were evaluated as part of the audit on which this report is based.	
	Page Title	URL
	Additional Information	https://cccapply2027.prelaunch.ca.s.myliaison.com/applicant/my-application/18331
	Application PDFs	https://cccapply2027.prelaunch.ca

	Student Resource	https://cccapply2027.prelaunch.ca/s.myliaison.com/applicant/my-application/20897
	In addition to the pages listed above, the following components that appear on multiple pages were tested as part of the audit: • Aside Navigation • Bottom Navigation • Footer Before Login • Footer Post Login • Header • Left Nav	

Evaluation Methods Used

A combination of automated and manual testing techniques was employed for the accessibility audit. The manual audit was performed using Windows and Chrome and included exclusive use of the keyboard. Automated tools used included Axe Auditor and the Axe DevTools browser extension. Assistive technologies employed included NVDA version 2025.1. Testing was conducted against WCAG 2.2 Level A and Level AA success criteria.

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

--	--

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.2	Level A (Yes) Level AA (Yes) Level AAA (No)
Revised Section 508 standards published January 18, 2017 and corrected January 22, 2018	Yes

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not Applicable:** The criterion is not relevant to the product.
- **Not Evaluated:** The product has not been evaluated against the criterion. This can be used only in WCAG 2.2 Level AAA.

WCAG 2.2 Report

Tables 1 and 2 also document conformance with Revised Section 508:

- Chapter 5 – 501.1 Scope, 504.2 Content Creation or Editing
- Chapter 6 – 602.3 Electronic Support Documentation

Note: When reporting on conformance with the WCAG 2.2 Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the WCAG 2.2 Conformance Requirements.

Table 1: Success Criteria, Level A

Criteria	Conformance Level	Remarks and Explanations

1.1.1 Non-text Content (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Informative images and icons are generally provided with text alternatives. The following exceptions exist: • Some informative images and active images (images that function as links or buttons) have missing or inadequate text alternatives, so screen reader users may not understand the information conveyed or the action performed. • In the mobile experience, the asterisk icon that marks required fields on Add screens (Add Colleges, Add Degree, Add Tests, Add Experiences, and similar) is not announced by the VoiceOver screen reader, so screen reader users are not told which fields are required.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Not Applicable	The evaluated CAS 3+ functionality does not contain prerecorded audio-only or video-only content.
1.2.2 Captions (Prerecorded) (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Not Applicable	The evaluated CAS 3+ functionality does not contain prerecorded synchronized media that would require captions.

1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Not Applicable	The evaluated CAS 3+ functionality does not contain prerecorded video that would require audio description or a media alternative.
1.3.1 Info and Relationships (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Information, structure, and relationships conveyed through presentation are generally programmatically determined or available in text. The following exceptions exist: • Heading levels skip one or more levels on some pages, so screen reader users who navigate by headings may misinterpret the structure and hierarchy of the content. • Some content that visually functions as a heading is not marked up as a heading, or heading markup does not reflect the visual structure of the page. • Some content presented visually as a list is not marked up as a list, so screen reader users are not told the number of items or that they are related. • Some groups of related form controls, such as radio buttons or checkboxes, are not associated with a group label, so screen reader users may not hear the question or context the controls belong to.
1.3.2 Meaningful Sequence (Level A)	Partially Supports	Content is generally presented in a meaningful sequence that can be

Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)		programmatically determined. The following exception exists: • On some pages the programmatic reading order does not match the visual order, so screen reader users may encounter content in a sequence that is confusing or changes its meaning.
1.3.3 Sensory Characteristics (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Instructions generally do not rely solely on sensory characteristics such as shape, color, size, or visual location. The following exception exists: • Required fields on pages such as Create Account and Edit My Profile are identified only by a red asterisk, with no text explaining its meaning. Users who cannot perceive or interpret the symbol may not know which fields are required.
1.4.1 Use of Color (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Color is generally not the only visual means of conveying information. The following exceptions exist: • Some content relies on color alone to convey information or distinguish elements, so users who cannot perceive color differences may miss that information. • Required field indicators rely on a red asterisk without an accompanying text explanation, so users with color vision deficiencies may not reliably identify required fields.
1.4.2 Audio Control (Level A)	Not	The evaluated CAS 3+ functionality does

Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Applicable	not contain audio that plays automatically for more than three seconds.
2.1.1 Keyboard (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Functionality is operable through a keyboard interface without requiring specific timings for individual keystrokes. Focus management after adding an entry through a side panel is reported under 2.4.3.
2.1.2 No Keyboard Trap (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Users can move focus into and away from all user interface components using only the keyboard. No open defects contradict conformance.
2.2.1 Timing Adjustable (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Where a session time limit applies, users are warned before it expires and can extend it. No open defects contradict conformance.
2.2.2 Pause, Stop, Hide (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software)	Not Applicable	The evaluated CAS 3+ functionality does not contain moving, blinking, scrolling, or auto-updating content that would require a pause, stop, or hide mechanism.

• 504.2 (Authoring Tool) • 602.3 (Support Docs)		
2.3.1 Three Flashes or Below Threshold (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Not Applicable	The evaluated CAS 3+ functionality does not contain content that flashes more than three times in any one-second period.
2.4.1 Bypass Blocks (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) – Does not apply to non-web software • 504.2 (Authoring Tool) • 602.3 (Support Docs) – Does not apply to non-web docs	Supports	A mechanism is available to bypass blocks of content repeated across pages. No open defects contradict conformance.
2.4.2 Page Titled (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Pages have titles that describe their topic or purpose. No open defects contradict conformance.
2.4.3 Focus Order (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software)	Partially Supports	Focusable components generally receive focus in an order that preserves meaning and operability. The following exceptions exist:

• 504.2 (Authoring Tool) • 602.3 (Support Docs)		• After an entry is added through a side panel, keyboard focus is not returned to a logical location, so keyboard and screen reader users may lose their place and need to navigate back to continue. • On the European Union Data Protection step, when a response of “Yes” is selected and VoiceOver reads the related content, focus is not placed on the paragraph being read, which can disorient screen reader users. • On some pages focus moves through interactive elements in a sequence that does not follow the visual layout, which may confuse keyboard and screen reader users.
2.4.4 Link Purpose (In Context) (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	The purpose of each link can be determined from its text or programmatic context. No open defects contradict conformance.
2.4.11 Focus Not Obscured (Minimum) (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	When a component receives keyboard focus, it is not entirely hidden by author-created content. No open defects contradict conformance.
2.5.1 Pointer Gestures (Level	Supports	Functionality does not require multipoint or

A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)		path-based gestures. No open defects contradict conformance.
2.5.2 Pointer Cancellation (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Single-pointer actions complete on the up event or can be aborted or undone. No open defects contradict conformance.
2.5.3 Label in Name (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	The accessible names of most components with visible labels include the visible label text. The following exception exists: • Some interactive components have accessible names that do not contain their visible label text, so speech input users may be unable to activate those components by speaking the visible label.
2.5.4 Motion Actuation (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	No functionality is triggered by device or user motion. No open defects contradict conformance.
2.5.7 Dragging Movements	Supports	Functionality does not require dragging

(Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)		movements. No open defects contradict conformance.
2.5.8 Target Size (Minimum) (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Most pointer targets meet the minimum size or spacing requirement, or qualify for an exception. The following exception exists: • Some interactive targets are smaller than 24 by 24 CSS pixels without sufficient spacing, which may make them difficult to activate for users with limited dexterity or tremors.
3.1.1 Language of Page (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	The default human language of each page is programmatically determined.
3.2.1 On Focus (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	A component receiving focus does not automatically initiate a change of context.
3.2.2 On Input (Level A) Also applies to: Revised Section 508	Supports	Changing the setting of a component does not automatically cause a change of context unless the user has been advised

• 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)		beforehand.
3.2.6 Consistent Help (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Help mechanisms that repeat across pages appear in the same relative location. No open defects contradict conformance.
3.3.1 Error Identification (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Input errors are identified and described to the user in text. No open defects contradict conformance.
3.3.2 Labels or Instructions (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Labels are generally provided when content requires user input. The following exceptions exist: • Required fields are marked with a red asterisk, but no instruction explains that the asterisk indicates a required field (for example, on the Create Account and Edit My Profile pages). • In the mobile experience, the required-field asterisk on Add screens is not conveyed to screen reader users.
3.3.7 Redundant Entry (Level A)	Supports	Information previously entered in the same process is auto-populated or available for

Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)		selection. No open defects contradict conformance.
3.3.8 Accessible Authentication (Minimum) (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Authentication does not rely on a cognitive function test without an alternative, such as support for pasting and browser-saved credentials. No open defects contradict conformance.
4.1.1 Parsing (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	In WCAG 2.2 this criterion is obsolete and is always considered satisfied; it is retained here for Revised Section 508 reporting.
4.1.2 Name, Role, Value (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	For most user interface components, name and role are programmatically determined and states and values are available to assistive technologies. The following exceptions exist: • Some interactive components do not expose an accurate name, role, state, or value to assistive technologies, so screen reader users may not be able to identify or operate those controls. • An accessibility defect has been identified on a tile in the Supporting

		Information area, which may prevent assistive technology users from accurately perceiving or operating that tile.
--	--	---

Table 2: Success Criteria, Level AA

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Not Applicable	The evaluated CAS 3+ functionality does not contain live synchronized media that would require captions.
1.2.5 Audio Description (Prerecorded) (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Not Applicable	The evaluated CAS 3+ functionality does not contain prerecorded video that would require audio description.
1.3.4 Orientation (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	CAS 3+ is available on mobile devices and content is not restricted to a single portrait or landscape orientation. No open defects contradict conformance.
1.3.5 Identify Input Purpose	Partially	Many input fields that collect personal

(Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	information can have their purpose programmatically determined. The following exception exists: • Some input fields that collect personal information about the user do not programmatically identify their purpose, so browsers and assistive technologies cannot reliably autofill them or present familiar icons.
1.4.3 Contrast (Minimum) (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Most text meets a contrast ratio of at least 4.5:1, or 3:1 for large text. The following exceptions exist: • Some regular-size text elsewhere in the application does not meet the 4.5:1 minimum contrast ratio. • Text contrast errors have been identified on the Create Account, Experiences, High School Attended, and College Attended pages, which may make that text difficult to read for users with low vision.
1.4.4 Resize Text (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Text can be resized up to 200% without loss of content or functionality. No open defects contradict conformance.
1.4.5 Images of Text (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software)	Supports	Text is presented as real text rather than images of text. No open defects contradict conformance.

• 504.2 (Authoring Tool) • 602.3 (Support Docs)		
2.1.4 Character Key Shortcuts (Level A) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Not Applicable	The evaluated CAS 3+ functionality does not implement keyboard shortcuts that use only letter, punctuation, number, or symbol characters.
2.4.5 Multiple Ways (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) – Does not apply to non-web software • 504.2 (Authoring Tool) • 602.3 (Support Docs) – Does not apply to non-web docs	Supports	More than one way is available to locate pages within the application. No open defects contradict conformance.
1.4.10 Reflow (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Most content reflows for narrow viewports, including the mobile experience. The following exception exists: • On some pages, at a width equivalent to 320 CSS pixels, content requires two-dimensional scrolling or content and functionality are lost or overlap, which affects users who zoom to read.
1.4.11 Non-text Contrast (Level AA) Also applies to: Revised	Partially Supports	Many user interface components and graphical objects meet the 3:1 contrast requirement. The following exceptions

Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)		exist: • The visual boundaries of some active user interface components, such as input fields and buttons, do not have a 3:1 contrast ratio with adjacent colors. • The visual indicators of some component states, such as selected, checked, or focused, do not have a 3:1 contrast ratio. • Some graphical objects required to understand content, such as icons, do not have a 3:1 contrast ratio. These issues may make controls and their states difficult to identify for users with low vision.
2.4.6 Headings and Labels (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Most headings and labels describe their topic or purpose. Heading markup and hierarchy issues are reported under 1.3.1. The following exception exists: • Some labels or headings are not descriptive enough to identify the purpose of the associated control or section, so users may not understand what information is requested.
1.4.12 Text Spacing (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Text spacing can be adjusted on most pages without loss of content or functionality. The following exception exists: • On some pages, adjusting line height, paragraph, letter, or word spacing causes text to be clipped, truncated, or overlapped, which affects users who adjust spacing to improve readability.

1.4.13 Content on Hover or Focus (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Partially Supports	Most additional content that appears on hover or focus meets the requirements. The following exception exists: • Some content that appears on hover or focus, such as tooltips or pop-ups, cannot be dismissed without moving the pointer or focus, cannot be hovered over, or disappears unexpectedly, which affects screen magnifier and keyboard users.
2.4.7 Focus Visible (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	A visible focus indicator is present during keyboard navigation. No open defects contradict conformance.
3.1.2 Language of Parts (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Not Applicable	The evaluated CAS 3+ functionality presents product content in a single language; there are no passages in another language that would require identification.
3.2.3 Consistent Navigation (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) – Does not apply to non-web software • 504.2 (Authoring Tool)	Supports	Navigation repeated across pages appears in the same relative order. No open defects contradict conformance.

• 602.3 (Support Docs) – Does not apply to non-web docs		
3.2.4 Consistent Identification (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) – Does not apply to non-web software • 504.2 (Authoring Tool) • 602.3 (Support Docs) – Does not apply to non-web docs	Supports	Components with the same function are identified consistently across pages. No open defects contradict conformance.
3.3.3 Error Suggestion (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	When an input error is detected and a correction is known, a suggestion is provided in text. No open defects contradict conformance.
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Before submissions that create commitments, such as submitting an application, users can review, correct, and confirm their information. No open defects contradict conformance.
4.1.3 Status Messages	Partially	Many status messages can be

(Level AA) Also applies to: Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	programmatically determined and presented to assistive technologies without receiving focus. The following exception exists: • Some status messages, such as confirmations, results, or progress updates, are not announced by screen readers, so users may not know that an action succeeded, failed, or is still in progress.
---	----------	---

As a multitenant configurable product, each program has its own combination of forms, questions, and content, which may affect conformance.

Table 3: Success Criteria, Level AAA

Level AAA success criteria have not been evaluated; therefore, the Level AAA table has been removed.

Revised Section 508 Report

Chapter 3: Functional Performance Criteria (FPC)

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Partially Supports	CAS 3+ supports modes of operation that do not require vision, including screen reader use. The following exceptions exist: • The required-field asterisk on Add screens is not announced by the screen reader in the mobile experience. • Focus does not follow the European Union Data Protection content being read by the screen reader.

		• Focus is not returned to a logical location after adding an entry through a side panel. • Heading levels skip on some pages, which affects heading-based navigation. • A tile in the Supporting Information area has an accessibility defect affecting assistive technology users. • Some images lack adequate text alternatives, and some components do not expose an accurate name, role, state, or value. • Some reading order, list, heading, and form-grouping markup does not reflect the visual structure. • Some status messages are not announced, and some accessible names do not match visible labels.
302.2 With Limited Vision	Partially Supports	CAS 3+ supports standard browser magnification and mobile display. The following exceptions exist: • Text contrast errors exist on the Create Account, Experiences, High School Attended, and College Attended pages and in other areas of the application. • Some component boundaries, state indicators, and graphical objects do not meet the 3:1 non-text contrast ratio. • On some pages content does not reflow at narrow widths, and adjusting text spacing causes content loss. • Some content shown on hover or focus is difficult for screen magnifier users to

		dismiss or keep visible.
302.3 Without Perception of Color	Partially Supports	Color is generally not the only visual means of conveying information. The following exceptions exist: • Some content relies on color alone to convey information. • Required fields are indicated with a red asterisk without an accompanying text explanation.
302.4 Without Hearing	Not Applicable	CAS 3+ does not rely on audio for any mode of operation.
302.5 With Limited Hearing	Not Applicable	CAS 3+ does not rely on audio for any mode of operation, so features that improve clarity, reduce background noise, or control volume are not required.
302.6 Without Speech	Not Applicable	CAS 3+ does not require speech input for any mode of operation.
302.7 With Limited Manipulation	Partially Supports	Functionality can be operated through a keyboard interface without specific keystroke timings. The following exceptions exist: • Focus is not returned to a logical location after adding an entry through a side panel, requiring additional navigation effort for keyboard and switch users. • Some interactive targets do not meet the minimum target size, making them difficult to activate for users with limited manipulation.
302.8 With Limited Reach	Partially	Functionality can be operated through a

and Strength	Supports	keyboard interface without specific keystroke timings. The following exceptions exist: • Focus is not returned to a logical location after adding an entry through a side panel, requiring additional navigation effort for users of alternative input methods. • Some interactive targets do not meet the minimum target size, making them difficult to activate precisely.
302.9 With Limited Language, Cognitive, and Learning Abilities	Partially Supports	CAS 3+ provides consistent navigation and help. The following exceptions exist: • The meaning of the required-field asterisk is not explained, which may confuse users with cognitive or learning disabilities. • Some labels and headings are not descriptive, and on some pages the reading order and focus order do not follow the visual layout, which increases cognitive effort.

Chapter 4: Hardware

Hardware is not applicable to this product; therefore, the hardware table has been removed.

Chapter 5: Software

Exception: Web applications that conform to all Level A and Level AA Success Criteria and all Conformance Requirements in WCAG 2.2 (incorporated by reference in Chapter 1) are not required to conform to 502 and 503.

Criteria	Conformance	Remarks and Explanations
----------	-------------	--------------------------

	Level	
501.1 Scope – Incorporation of WCAG 2.2 AA	See WCAG 2.2 section	See information in WCAG 2.2 section
502 Interoperability with Assistive Technology	Heading cell – no response required	
502.2.1 User Control of Accessibility Features	Not Applicable	CAS 3+ is a web-only application and is not platform software; platform accessibility features are controlled by the operating system.
502.2.2 No Disruption of Accessibility Features	Not Applicable	CAS 3+ is a web-only application; it runs within the browser and does not alter platform accessibility features.
502.3 Accessibility Services	Heading cell – no response required	
502.3.1 Object Information	Not Applicable	CAS 3+ is a web-only application; object information is exposed through the browser, as reported under WCAG 4.1.2.
502.3.2 Modification of Object Information	Not Applicable	CAS 3+ is a web-only application; object information is exposed through the browser rather than platform accessibility services.
502.3.3 Row, Column, and Headers	Not Applicable	CAS 3+ is a web-only application; table structure is exposed through the browser, as reported under WCAG 1.3.1.
502.3.4 Values	Not Applicable	CAS 3+ is a web-only application; values are exposed through the browser, as reported under WCAG 4.1.2.
502.3.5 Modification of Values	Not Applicable	CAS 3+ is a web-only application; values are modified through browser-rendered controls.
502.3.6 Label Relationships	Not	CAS 3+ is a web-only application; label

	Applicable	relationships are exposed through the browser, as reported under WCAG 1.3.1 and 4.1.2.
502.3.7 Hierarchical Relationships	Not Applicable	CAS 3+ is a web-only application; hierarchical relationships are exposed through the browser, as reported under WCAG 1.3.1.
502.3.8 Text	Not Applicable	CAS 3+ is a web-only application; text content is exposed through the browser.
502.3.9 Modification of Text	Not Applicable	CAS 3+ is a web-only application; text is edited through browser-rendered form controls.
502.3.10 List of Actions	Not Applicable	CAS 3+ is a web-only application; available actions are exposed through the browser.
502.3.11 Actions on Objects	Not Applicable	CAS 3+ is a web-only application; actions on objects are performed through browser-rendered controls.
502.3.12 Focus Cursor	Not Applicable	CAS 3+ is a web-only application; focus is managed by the browser, as reported under WCAG 2.4.3 and 2.4.7.
502.3.13 Modification of Focus Cursor	Not Applicable	CAS 3+ is a web-only application; focus is managed by the browser rather than platform accessibility services.
502.3.14 Event Notification	Not Applicable	CAS 3+ is a web-only application; event notifications are exposed through the browser, as reported under WCAG 4.1.3.
502.4 Platform Accessibility Features	Not Applicable	CAS 3+ is a web-only application and is not a software platform.
503 Applications	Heading cell – no response required	

503.2 User Preferences	Not Applicable	CAS 3+ is a web-only application; user preferences for color, contrast, font size, and focus are applied by the browser and operating system.
503.3 Alternative User Interfaces	Not Applicable	CAS 3+ is a web-only application and does not provide an alternative user interface that functions as assistive technology.
503.4 User Controls for Captions and Audio Description	Heading cell – no response required	
503.4.1 Caption Controls	Not Applicable	CAS 3+ is a web-only application and does not contain synchronized media requiring caption controls.
503.4.2 Audio Description Controls	Not Applicable	CAS 3+ is a web-only application and does not contain synchronized media requiring audio description controls.
504 Authoring Tools	Heading cell – no response required	
504.2 Content Creation or Editing (if not authoring tool, enter “not applicable”)	See WCAG 2.2 section	See information in WCAG 2.2 section
504.2.1 Preservation of Information Provided for Accessibility in Format Conversion	Not Applicable	CAS 3+ is a web-only application and does not convert content between formats in an authoring context.
504.2.2 PDF Export	Not Applicable	CAS 3+ is a web-only application and is not an authoring tool that exports authored content to PDF.
504.3 Prompts	Not Applicable	CAS 3+ does not provide authoring prompts for creating accessible content.

504.4 Templates	Not Applicable	CAS 3+ does not provide authoring templates for creating accessible content.
-----------------	----------------	--

Chapter 6: Support Documentation and Services

Criteria	Conformance Level	Remarks and Explanations
601.1 Scope	Heading cell – no response required	
602 Support Documentation	Heading cell – no response required	
602.2 Accessibility and Compatibility Features	Supports	CAS 3+ provides electronic applicant help documentation. End users with disabilities can request additional support documentation by contacting CAS applicant support.
602.3 Electronic Support Documentation	See WCAG 2.2 section	See information in WCAG 2.2 section
602.4 Alternate Formats for Non-Electronic Support Documentation	Supports	End users with disabilities can request support documentation in alternate formats by contacting CAS applicant support.
603 Support Services	Heading cell – no response required	
603.2 Information on Accessibility and Compatibility Features	Supports	CAS 3+ applicant help documentation is available electronically, and end users with disabilities can request additional information on accessibility features by contacting CAS applicant support.
603.3 Accommodation of Communication Needs	Supports	CAS applicant support is available through the applicant help center, and users with disabilities can submit support requests electronically.
